## FOREWORD

This gazetteer contains about 7,500 entries for places and features in Nicaragua. Research for this publication was completed in February 1975.

The names in this gazetteer supersede those in all previous U.S. Board on Geographic Names lists for the area concerned.

The entries include standard names approved by the Board and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The basic name coverage corresponds to that of maps at the scale of 1:250,000. Entries include the name of first- and second-order administrative divisions, populated places of all sizes, various other cultural entities, and a variety of physical features.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on one or more of the following sources:

1. *Nicaragua 1:250,000*, E503, Dirección General de Cartografía (DGC) in collaboration with Inter American Geodetic Survey (IAGS), 1962–71.
2. *Nicaragua 1:50,000*, E751, E752, Army Map Service/ DGC or Instituto Geográfico Nacional/IAGS, 1956–72.
3. *Nicaragua 1:10,000*, DGC, 1968–69. (Corn Islands in two sheets; not covered by E751 above.)
4. *Nicaragua 1:25,000*, DGC E851, 1965–67. (Cays off east coast; not covered by E751 above.)
5. *Joint Operations Graphic*, DMATC1501, 1969–72; scale 1:250,000. Partial coverage of Nicaragua in eight sheets.
6. *Hydrographic Charts*, Defense Mapping Agency Hydrographic Center, various dates and scales; Numbers 28061, 28081, 28083, and 28101.

### Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to machine tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." If part of a name is underlined, the use of the part not underlined is optional. If two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus, *Punta el Papayal*, the name of a point, is listed as *Papayal*, *Punta el*. Language labels are used to identify alternate local names of noninternational features. Local names of international features are identified by country labels. A single name followed by a country label indicates that no name is available for the feature in the adjacent country or countries.

Spanish names follow standard Spanish orthography. The diacritical marks, the acute ('), the dieresis (''), and the tilde (~) are employed in accord with *Gramática de la lengua española*, Real Academia Española, Madrid. The definite articles (*el, la, las, los*) should be capitalized when shown in name-initial position on reliable sources, and in similar names or related features. Otherwise, articles, prepositions, and conjunctions should be lowercased.

The alphabetic order of entries in this gazetteer is in accord with English language lexical practice; thus *ch* appears between *cg* and *ci*, *ll* appears between *lk* and *lm*, and *ñ* is alphabetized as if not bearing a diacritic.

Many features on the eastern coastal plain, on the offshore cays, and along the lower reaches of the Rio Coco bear names in the Miskito Indian tongue or in English. Spellings vary and names were approved on the basis of evidence from the most reliable sources.

**Designation.**—The second column contains designations or abbreviations of designations of the entities to which the names apply, as listed below. Because practically all geographic terms have varied meaning, the senses in which many of the designations are applied in *this gazetteer* are stated in the list to reduce ambiguity. It should be noted also that the differentiations of terms that can be made in any gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. In Nicaragua, some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

|      |  |
|------|--|
| ADM  | first-order administrative division ( <i>departamento</i> ); second-order administrative division ( <i>municipio</i> ) |
| BAR  | sandbar (deposit of waterborne materials at or below water level at the mouth of a stream)                             |
| BAY  | bay (coastal indentation of a size intermediate between a gulf and a cove)   |
| BCH  | beach (deposit of sand or other unconsolidated material along a shore)   |
| BDG  | bridge   |
| BGHT | bight (open body of water forming a slight recession in a coastline)   |
| BLDG | building   |
| BND  | stream bend (conspicuously curved portion of a stream; may in some cases include the area enclosed by the bend)        |
| BP   | boundary marker  |
| BSNH | headwater basin (area drained by the headwaters of one or more streams)  |

|      |  |
|------|--|
| BUTE | butte (small, isolated, usually flat-topped hill with steep sides)   |
| CAPE | cape (seaward end of a projection of land of such position and size as to affect the course of ships)  |
| CH   | church; chapel   |
| CHNM | marine channel (channel between coastal islands, reefs, or shoals; between an offshore feature and the mainland; or through a shallow marine water body)               |
| CMP  | camp   |
| CNFL | confluence (place where two or more streams flow together)   |
| COL  | agricultural colony (tract of land set aside for agricultural settlement)  |
| CONE | volcanic cone (cone-shaped elevation formed by volcanic eruption, usually with a crater or breached crater at the top)   |
| COVE | cove (small bay)   |
| CRKT | tidal creek (watercourse tidal in all or most of its length; usually short, without extensive tributary drainage areas, and located in coastal marsh or other wetland) |
| CRTR | crater (generally circular central depression in a volcanic cone)  |
| CST  | coast (general region of indefinite width that extends from the sea inland to the first major change in terrain features)  |
| CUET | cuesta (ridge characterized by a steep escarpment on one side and a long, gentle slope on the other, formed on tilted strata of hard rock overlying softer rock)       |
| DAM  | dam (barrier constructed across a stream to impound water)   |
| ENTR | entrance (opening from the sea into a lagoon, bay, or harbor)  |
| FLL  | waterfall  |
| FLLS | cascade  |

|      |   |      |  |
|------|---|------|--|
| FORD | ford (place where a stream may be safely crossed without a bridge or boat)  | MESA | mesa (flat or nearly flat landform less extensive than a plateau with abrupt or steeply sloping side or sides) |
| FRM  | farm (small agricultural unit consisting of a farmstead and associated land, usually owned and operated by a single family)   | MN   | mine   |
| GULF | gulf (large, broad water body indenting a coast)  | MRSH | marsh (wetland characterized by grasses or bush vegetation and few or no trees)                                |
| HDLD | headland (conspicuously high piece of land jutting out into or fronting the sea)  | MSSF | massif (elevated, generally mountainous block of the Earth's crust)  |
| HLL  | hill (landform with moderate relief, moderate to low elevation, and small summit area)  | MT   | mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)                   |
| HLLS | hills   | MTS  | mountains; mountain range  |
| HMCK | hummock (slightly elevated area in a wetland; characterized by firm, well-drained ground and consequent associations of soil and vegetation)  | NRWS | narrows (constricted part of a water body or connection between two water bodies)                              |
| INLT | inlet (small, narrow indentation in a coast)  | OILT | oil tank farm  |
| ISL  | island  | PASS | pass (way over or between mountains or other elevated land)  |
| ISLP | land-tied island (former island joined to the mainland by natural processes of deposition)  | PCLI | independent political entity (republic)  |
| ISLS | islands   | PEN  | peninsula (area of land projecting into and largely, but not entirely, surrounded by water)                    |
| ISTH | isthmus (narrow strip of land joining two wider land areas and separating two water bodies)   | PIER | pier (long, narrow structure extending into the water to afford a berthing place for vessels)                  |
| LCTY | locality (minor area or place of unspecified or mixed character and indefinite boundaries)  | PK   | peak (separately named summit on a more extensive elevation)   |
| LDNG | landing (place where small boats are tied up or beached; place where boats touch land for the purpose of taking on or discharging people or cargo)                                    | PKS  | peaks  |
| LGN  | lagoon (water body along a coast, largely or wholly cut off from the sea by a barrier beach or fringe of islands)   | PLN  | plain (landform of low relief, slope, and elevation)   |
| LK   | lake; oxbow lake  | PND  | pond (small standing water body)   |
| LKC  | crater lake (lake in the crater of a volcanic cone)   | PNDI | intermittent ponds   |
| LKI  | intermittent lake (seasonal water body which becomes a lake during periods of rain but which dries up or becomes a marsh or waterhole during the dry season); intermittent oxbow lake | PNDS | ponds  |
| LKSC | crater lakes  | POOL | pool (enlargement in a perennial stream)   |
|      |   | PPL  | populated place (city, town, village, settlement, central)   |
|      |   | PT   | point (relatively minor projection of land, or its extremity, into a water body)                               |
|      |   | RCH  | reach (relatively straight, low-gradient segment of a river)   |
|      |   | RDGE | ridge (elongated, relatively narrow relief feature with a more or less continuous crest)                       |

|      |  |      |   |
|------|--|------|---|
| RF   | reef (offshore consolidated rock hazard to navigation with a least depth of 20 meters [or 10 fathoms] or less)   | STMA | anabanch (lesser stream that leaves the main stream and rejoins it after following a separate course for a considerable distance)   |
| RKSW | rocks in water (rocks of such character and importance as to be identified by name, situated either above or below the surface of a body of water; often associated with reefs but separately named) | STMD | distributary (secondary watercourse carrying part of the drainage of a larger stream into another water body; characteristic of deltas)   |
| RKW  | rock in water  | STMI | intermittent stream (stream, no part of which is indicated as perennial)  |
| RPDS | rapids   | STMM | stream mouth  |
| RSRT | resort (one or more buildings used chiefly for recreation and associated service activities, usually with accommodations for guests)   | STRT | strait (relatively narrow passage connecting larger bodies of water)  |
| RSTN | railroad station (building used for the transaction of railroad business, located beside a railroad track at a point where trains regularly stop to take on and discharge passengers or freight)     | VLC  | volcano (orifice in the Earth's surface through which mineral matter is or has been extruded or ejected in a liquid or gaseous state, together with such associated or resultant features as fissures, vents, lava flows, cones, craters, plugs, dikes, and crater lakes) |
| RSV  | reservoir (large artificially impounded body of water)   | WTCD | deltaic watercourse (lesser watercourse connecting distributaries or other drainage features on a delta)  |
| RUIN | ruins (structures in a state of ruin, but not necessarily of great antiquity or archeological interest)  |      |   |
| SALT | salina (salt-evaporation field, diked and ditched, with associated structures)   |      |   |
| SAND | sand area  |      |   |
| SCH  | school   |      |   |
| SEA  | sea  |      |   |
| SHOL | shoal (an offshore hazard to navigation with a least depth of 20 meters [or 10 fathoms] or less, composed of unconsolidated material)  |      |   |
| SLP  | slope(s) (gradient on the side or end of a mountain or other relief feature, less steep than a cliff)  |      |   |
| SPUR | spur (short sloping ridge extending laterally from a mountain or other elevation)  |      |   |
| STDM | stadium  |      |   |
| STM  | stream (river or other running, fresh water body, perennial in all or a part of its course)  |      |   |

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at the summits of mountains and hills, at the extremities of points, and near the centers or midpoints of other features.

Area number.—The number in the fifth column indicates the first-order administrative unit (*departamento*) in which the place or feature is located, as listed below:

#### Glossary of generic terms

The following terms occur as the generic parts of standard names in the gazetteer. The English term or terms which correspond to each local term were determined by objective study of cartographic and other source materials, and do not necessarily reflect dictionary or other normalized usages. The parenthetical abbreviation (I) designates Indian words; all others are Spanish.
